<current>

<request>

You are working on an issue in the 'amber-lang/amber' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/amber/amber (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

Consider the following problem statement:

<problem_statement>
Separate type-checking from the ParsingModule to a new TypeCheckModule trait for all the modules.
</problem_statement>

Implement the necessary changes to the repository so that the requirements specified in the <problem_statement> are met.

Ensure that you lint, build and test early and iteratively to validate each code change thoroughly.
