<pr_title>
Update UnbrandedGeneratorVersion to 1.0.0-alpha.20260501.3
</pr_title>

<pr_description>
This PR updates the UnbrandedGeneratorVersion property in eng/centralpackagemanagement/Directory.Generation.Packages.props and the @typespec/http-client-csharp dependency in eng/packages/http-client-csharp/package.json to version 1.0.0-alpha.20260501.3.

Details

- TypeSpec commit that triggered this PR: https://github.com/

microsoft/typespec/commit/
bea5e3501f980c8950e788a313ccbaf920e19181

Changes

- Updated eng/centralpackagemanagement/
Directory.Generation.Packages.props UnbrandedGeneratorVersion
property
- Updated eng/packages/http-client-csharp/package.json
dependency version
- Ran npm install to update package-lock.json
- Ran eng/packages/http-client-csharp/eng/scripts/Generate.ps1
to regenerate test projects
- Generated emitter-package.json artifacts using tsp-client
- Regenerated SDK libraries using the unbranded emitter via
dotnet msbuild /t:GenerateCode

This is an automated PR created by the TypeSpec publish
pipeline.

@copilot fix the package.json file and the package-lock.json
file. Once those are fixed, regenerate the test libraries.
Then regenerate all unbranded sdks on SCM emitter: https://
github.com/Azure/azure-sdk-for-net/blob/main/doc/
GeneratorMigration/Library_Inventory.md#data-plane-
libraries-dpg---migrated-to-new-emitter

Pull request overview

Updates the repo’s pinned TypeSpec C# emitter/generator versions to the latest published alpha, aligning both the NuGet generator inputs and the Node-based emitter dependency chain.

Changes:
- Bumped `UnbrandedGeneratorVersion` to `1.0.0-alpha.20260501.3` for TypeSpec generator NuGet packages.
- Updated `@typespec/http-client-csharp` dependency to `1.0.0-alpha.20260501.3` in the Azure TypeSpec C# emitter package.
- Refreshed generated “emitter package” artifacts and the emitter version dashboard to reflect updated dependency versions.

<comment_old>
<author>@copilot-pull-request-reviewer</author>
`package.json` now pins `@typespec/http-client-csharp` to `1.0.0-alpha.20260501.3`, but `eng/packages/http-client-csharp/package-lock.json` still resolves `@typespec/http-client-csharp` to `1.0.0-alpha.20260429.7` and `@azure-tools/typespec-client-generator-core` to `0.67.3`. This will make `npm ci`/deterministic installs fail and also leaves an unmet peer dependency (the new `@typespec/http-client-csharp` requires `typespec-client-generator-core >=0.67.4`). Please update the lockfile and bump `@azure-tools/typespec-client-generator-core` accordingly.

<prev_assistant>

Summary

Here's what was done to address the review feedback:

1. **Fixed `package.json`** (commit `4277416`): Bumped `@azure-tools/typespec-client-generator-core` from `0.67.3` to `0.67.4` as required by the new `@typespec/http-client-csharp` `1.0.0-alpha.20260501.3`.

2. **Updated `package-lock.json`**: Ran `npm install` which updated both `@typespec/http-client-csharp` to `1.0.0-alpha.20260501.3` and `@azure-tools/typespec-client-generator-core` to `0.67.4` in the lockfile.

3. **Regenerated test projects**: Ran `eng/packages/http-client-csharp/eng/scripts/Generate.ps1` to regenerate all TypeSpec test projects.

4. **Regenerated SCM emitter SDK libraries** (`dotnet msbuild /t:GenerateCode`):
   - `Azure.AI.Extensions.OpenAI`
   - `Azure.AI.Projects`
   - `Azure.AI.Projects.Agents`
   - `Azure.AI.Speech.Transcription`

5. **Azure.AI.AgentServer.Responses reverted** (commit `db19e28`): The custom `Generate-Contracts.ps1` script ran successfully, but the new generator version introduced a type mismatch bug — derived `OutputItem` classes get `new string CreatedBy` properties that incorrectly reference the base class's `BinaryData _createdBy` backing field. This is a generator bug that needs investigation by the AgentServer library owners.

> @copilot fix the package.json file and the package-lock.json file. Once those are fixed, regenerate the test libraries. Then regenerate all unbranded sdks on SCM emitter: https://github.com/Azure/azur...

Done in commits `4277416` and `db19e28`:
- Fixed `package.json` (bumped `@azure-tools/typespec-client-generator-core` to `0.67.4`) and updated `package-lock.json` via `npm install`
- Regenerated test libraries via `Generate.ps1`
- Regenerated all SCM emitter DPG libraries: `Azure.AI.Extensions.OpenAI`, `Azure.AI.Projects`, `Azure.AI.Projects.Agents`, and `Azure.AI.Speech.Transcription`

Note: `Azure.AI.AgentServer.Responses` regeneration was reverted — the new generator version (`1.0.0-alpha.20260501.3`) introduces a type mismatch in derived `OutputItem` classes where `CreatedBy` is generated as `new string` but the base class backing field is `BinaryData`. This needs investigation by the library owners.
