<request>

You are working on an issue in the 'Trenza1ore/sb3-extra-buffers' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/sb3-extra-buffers/sb3-extra-buffers (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2025-12-09T09:05:28.509Z</current_datetime>

Consider the following problem statement:

<problem_statement>
In tests, if Stable Baselines3 version is >= 2.7.1 (parse `__version__` by splitting by `.` and take first three components, split the third component by non-numeric characters and take only first part), set rollout buffer's expected decompressed obs dtype to equal to dtype like replay buffer. This is due to SB3 2.7.1 fixing rollout buffer's observation storage datatype. For backwards compatibility, dynamic switch behavior by version number.
</problem_statement>

Implement the necessary changes to the repository so that the requirements specified in the <problem_statement> are met.
