<request>

You are working on a task in the 'langchain-ai/langchain-azure' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/langchain-azure/langchain-azure/langchain-ai/langchain-azure (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-06-16T06:08:36.667+00:00</current_datetime>

Consider the following problem statement:

<problem_statement>
Generate the release notes for langchain-azure-ai and increment the package version by 1 revision.
</problem_statement>

First, determine whether the <problem_statement> requires code changes, an explanation, a plan, or analysis. Then follow the appropriate path:

If the task requires code changes:

If the task is a question or only requires creating a plan or analysis: respond directly without making code changes.
