<request>

You are working on a task in the 'sparta/sparta' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/sparta/sparta (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-07-11T02:01:56.621+00:00</current_datetime>

Consider the following problem statement:

<problem_statement>
Please make a new branch with new commits that use the correct email posted above.
</problem_statement>

First, determine whether the <problem_statement> requires code changes, an explanation, a plan, or analysis. Then follow the appropriate path:

If the task requires code changes:

If the task is a question or only requires creating a plan or analysis: respond directly without making code changes.

<prev_assistant>

The new branch `copilot/fix-issues-651-652-coauthor-email` has been successfully pushed to origin with both commits rewritten to use the correct co-author email (`upendra.yadav001@gmail.com` instead of the noreply GitHub email). It contains fresh commits (SHAs `4f0a984` and

`6390e38`) that are otherwise identical in content to the originals, just with the corrected `Co-authored-by` trailer.
