<current>

<request>

You are working on an issue in the 'mlflow/mlflow' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/mlflow/mlflow (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

Consider the following problem statement:

<problem_statement>
Remove typing-extensions pin for sqlalchemy: https://github.com/mlflow/mlflow/blame/54379b8c6924fecf6e3e9ec41764d9f50ce707ea/requirements/test-requirements.txt#L35C6-L35C6

because sqlalchemy has the pin: https://github.com/sqlalchemy/sqlalchemy/blame/a04deb60ac28fa9e2555bb89ffdcd676514ef05d/pyproject.toml#L33
</problem_statement>

Implement the necessary changes to the repository so that the requirements specified in the <problem_statement> are met.

Ensure that you lint, build and test early and iteratively to validate each code change thoroughly.
