This section details on the original issue you should resolve

<issue_title>[SDK Parity] Python for PR microsoft/Agent365-dotnet#133</issue_title>
<issue_description>## SDK Parity Update Required

This issue was automatically created by the AI-First Polling workflow to maintain SDK parity.

Source PR Information
Original PR: microsoft/Agent365-dotnet#133 - [Observability] Scope and domain overrides
PR URL: https://github.com/microsoft/Agent365-dotnet/pull/133
PR Author: @threddy

PR Description
Why? To enable 1P testing in pre-prodWhat? Enable overrides for scope and domain via environment variables

```
"A365_OBSERVABILITY_DOMAIN_OVERRIDE" and
"A365_OBSERVABILITY_SCOPE_OVERRIDE".------This PR introduces
configuration-based overrides for the observability domain and
authentication scope to enable testing against pre-production
environments. The changes add two new configuration keys
(A365_OBSERVABILITY_DOMAIN_OVERRIDE and
A365_OBSERVABILITY_SCOPES_OVERRIDE) that allow runtime
customization of Power Platform API endpoints and authentication
scopes without code changes.Key ChangesAdded
EnvironmentUtils.Initialize() method to cache scope override
from configurationExtended PowerPlatformApiDiscovery and
Agent365ExporterCore to accept optional domain overridesCreated
comprehensive test coverage for both override mechanisms

---

### Parity Task
**Changes detected in:** .NET/C# SDK
**Target SDK:** Python

### Action Required
Please apply the changes described in the original PR
(microsoft/Agent365-dotnet#133) to the Python SDK to maintain
feature parity across all SDKs.

**Before implementing:**
- First, check if this feature already exists in the Python SDK
- If the feature is already implemented, close this issue with
the `wontfix` label and add a comment explaining that parity
already exists

**For bug fixes (IMPORTANT):**
- Bug fixes require extra caution - only act if the same bug
exists in the Python SDK
- Carefully analyze whether the bug described in the original PR
replicates in the target platform
- If the bug does NOT exist in the Python SDK, close this issue
with the `wontfix` label and explain that the bug is not present
- Stay strictly in context - only fix the specific bug
described, do not make additional changes or "improvements"
- Do not port bug fixes that are specific to the source SDK's
language or platform constraints

**When creating the PR for this implementation:**
- Assign the PR to @threddy (the author of the original PR)
- Reference this issue in the PR description
- Ensure the PR description explains what parity changes were
```

```
made

### Implementation Guidelines for Python
When implementing this feature in the Python SDK:
- Review existing code in `python/libraries/` to understand the
codebase structure and patterns
- Follow the coding style, naming conventions, and architectural
patterns used in the Python SDK
- Check for configuration files (e.g., `pyproject.toml`,
`.flake8`, `mypy.ini`) that define coding standards
- Ensure your implementation is consistent with existing SDK
components
- Include appropriate tests following the testing patterns in
the Python SDK

### Related Information
- **Workflow Run:** https://github.com/microsoft/AI-First-
Development/actions/runs/20860864857
- **Trigger:** Polling workflow
- **Detected:** 2026-01-09 18:00:13 UTC

---
*This is an automated issue. Please close with `wontfix` label
if parity is not needed.*</issue_description>
