<current>

<request>

You have been given comments on the previous commits you made in the repository.

You are working on an issue in the 'GhostESP-Revival/GhostESP' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/GhostESP/GhostESP (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

Consider the following problem statement:

<problem_statement>

This section includes details on the pull request with code changes you have already submitted to fix the problem above.

<pr_title>
[v2.0] Improved Accessibility
</pr_title>

<pr_description>
What's new (Author - fill this out)
- Added a new Accessibility settings menu with Font Size, Bold Text, High Contrast, Reduced Motion, Epilepsy Warning, and Input Repeat Speed options.
- Added accessibility configuration to the setup wizard.
- Added centralized accessibility font helpers and wired font scaling through display/UI views.

Changed

```
- Input repeat timing is configurable for joystick and T-Deck
keyboard input.
- Reduced motion disables or shortens view fades, carousel
transitions, popup fades, and splash delay.

# Removed
-

# Verification (Author - fill this out)
- I have tested Primary device(s) (list exact HW + config):
TEmbedCC1101
- I have tested potentially affected devices (and/or list
potential affected devices not available to you):
- I have wrapped device specific code with `#ifdef CONFIG_...`
or similar: [ ] Yes / [X] N/A
- I have updated Hugo Docs with any new or changed info for end
users: [ ] Yes / [ ] N/A

## Linked Issues
- Closes #

## Checklist (Reviewer - don't fill this out)
- [X] Code builds, flashes, and feature verified with no
functional issues on listed device(s)
- [a lil] Changes reviewed for unintended impact on other
devices/targets

</pr_description>

<stacked_pr_context>
The pull request you are currently working on is a stacked pull
request on top of another pull request. The base branch is `two-
point-zero`, not the default branch `Development-deki`. A pull
request has already been created for your branch. Do not attempt
to create a new pull request. If you are asked to fix CI, build,
test, or workflow failures, check the GitHub Actions workflow
runs for the original branch (`two-point-zero`) first. If you
don't find relevant failures there, then check your branch
(`accessibility2.0`).
</stacked_pr_context>

## Comments on the PR (you are @copilot in this section)

<comments>

</pr_comments>

</comments>

The last **4** git commits in this branch are the changes you have made so far. Use those as your change commit history.
</problem_statement>

Analyze and determine if action or explanation is needed
<rules_for_making_changes>
* Start by fully understanding <problem_statement> and the <comments> before making any changes. You will only address the <comment_new> comments. Reply to new comments as you address them. Ignore comments that are not actionable or directed at you.
* For each new comment, determine:
    - If it a request for changes, a question on the code or a suggestion.
    - Is it addressed to you or someone else, e.g. "Hey @username, ..." or "@username can you ...".
    - Is it a general comment or praise.
* If there are no comments you need to address or reply to, you can stop now without exploring or explaining yourself.
* If the user's ask is not clear, you can reply to the comment and ask for clarification.
* If an action or explanation is needed, follow the steps below.
</rules_for_making_changes>

A **CI/Build Failure** has been mentioned in the problem statement, make sure to follow your instructions for addressing CI/Build Failures.
