<request>

You are working on a task in the 'primer/brand' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/brand/brand (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-04-14T19:11:43.053Z</current_datetime>

Consider the following problem statement:

<problem_statement>
Review this bug report and tell me you can reproduce it in primer brand's storybook. If you can, open a PR to fix it and add a test to confirm it works.
</problem_statement>

First, determine whether the <problem_statement> requires code changes, an explanation, a plan, or analysis. Then follow the appropriate path:

If the task requires code changes:

If the task is a question or only requires creating a plan or analysis: respond directly without making code changes.
