<request>

You are working on a task in the 'readium/swift-toolkit' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/swift-toolkit/swift-toolkit (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-06-26T13:24:24.464+00:00</current_datetime>

Consider the following problem statement:

<problem_statement>
Address this PR, but in this repository, then open a PR: https://github.com/opds-community/specs/pull/5
Basically replacing drafts.opds.io by specs.opds.io everywhere
</problem_statement>

First, determine whether the <problem_statement> requires code changes, an explanation, a plan, or analysis. Then follow the appropriate path:

If the task requires code changes:

If the task is a question or only requires creating a plan or analysis: respond directly without making code changes.
