<current>

<request>

You are working on a task in the 'github/gh-aw' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/gh-aw/gh-aw (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-06-04T04:18:19.541+00:00</current_datetime>

Consider the following problem statement:

<problem_statement>
Create a PR to fix the failing GitHub Actions job "JS Tests (shard 1/4)"
Analyze the Actions logs, identify the root cause of the failure, and implement a fix.

lint js, lint go.

Check run ID: 79447373084
Job URL: https://github.com/github/gh-aw/actions/runs/26929901352/job/79447373084
</problem_statement>

First, determine whether the <problem_statement> requires code changes, an explanation, a plan, or analysis. Then follow the appropriate path:

If the task requires code changes:

If the task is a question or only requires creating a plan or analysis: respond directly without making code changes.
