# 389ca46b-a6dc-4aab-8b23-658f37771853

## <prev_user>

### <request>

You have been given comments on the previous commits you made in the repository.

You are working on an issue in the 'microsoft/griffel' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/griffel/griffel (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

Consider the following problem statement:

<problem_statement>

---
*This section includes details on the pull request with code changes you have already submitted to fix the problem above.*

<pr_title>
feat(transform): unify webpack-loader and webpack-extraction-plugin functionality into @griffel/transform
</pr_title>

<pr_description>
- [x] Analyze current state: feat/new-plugin branch has @griffel/transform and @griffel/webpack-plugin packages
- [x] Understand the integration point between webpack-loader/webpack-extraction-plugin functionality in @griffel/transform
- [x] Move relevant code from existing webpack-loader and webpack-extraction-plugin into @griffel/transform package
  - ✅ Complete OXC-based transformation implementation
  - ✅ CSS extraction functionality with </pr_description>`cssRulesByBucket` output
  - ✅ Support for makeStyles and makeResetStyles transformation

  - ✅ AST and VM-based evaluation for complex expressions
  - ✅ Asset handling and import inlining
- [x] Address all PR feedback:
  - ✅ Added `magic-string` dependency to root package.json, then moved to dependencies section
  - ✅ Reverted package.json description to original "A package that performs build time transforms for Griffel"
  - ✅ Fixed transformSync.mts code issue (lines 329-332) - moved dedupeCSSRules call inline
  - ✅ Removed `generateCSSRules` utility and test files
  - ✅ Removed `shouldTransformSourceCode` utility and test files
  - ✅ Removed utility function exports from index.mts
  - ✅ Updated README.md - removed overview section line, utility functions section, Performance section, Features section, and all API references to removed utilities
  - ✅ Formatted all files with Prettier
- [x] Latest changes:
  - ✅ Moved `magic-string` from devDependencies to dependencies in root package.json
  - ✅ Removed Features section from README.md (lines 22-29)
  - ✅ Moved `oxc-parser` and `oxc-walker` from devDependencies to dependencies in root package.json
- [x] Validate that build and basic functionality work ✅ - All 14 tests pass, build successful (13.94 kB)
- [x] Clean up any redundant code ✅ - Simplified API surface, removed utility functions, cleaned up README

The @griffel/transform package now has a focused API with just the core `transformSync` functionality and linaria re-exports, with a minimal README and proper dependency management. All core dependencies (magic-string, oxc-parser, oxc-walker) are now in dependencies section for proper runtime availability.

Fixes #701.

## Comments on the PR (you are @copilot in this section)

<comments>

<pr_comments>

</pr_comments></comments>`packages/transform/__fixtures__`
- Undo changes in `packages/transform/README.md`
- Run format on new files
- Write a new `packages/transform/README.md`

`packages/transform/__fixtures__`
...

Addressed all feedback in commit e5f7b9c:
- ✅ Removed `packages/transform/__fixtures__` directory
- ✅ Reverted `packages/transform/README.md` to original state
- ✅ Formatted all new TypeScript files with Prettier
- ✅ Wrote comprehensive new README with API documentation and usage examples

Tests simplified to 22 focused unit tests (no fixtures), all passing. Package builds successfully at 14.99 kB.
