<author>@dtoxvanilla1991</author>
@copilot fix the build CI failure with minimal required changes. Check for any migration required since it is a major `-v` bump.
</comment_new>

</pr_comments>

</comments>

The last **1** git commits in this branch are the changes you have made so far. Use those as your change commit history.
</problem_statement><rules_for_making_changes>
* Start by fully understanding <problem_statement> and the <comments> before making any changes. Treat <comment_old> comments as context only and do not make changes solely to satisfy them.
* Only act on <comment_new> comments that explicitly mention you (@copilot). To understand the context of comments that explicitly mention you, you may use other comments that do not explicitly mention you. Do not act on comments that don't explicitly mention you or reply to them, even if they are marked as <comment_new>.
* If the PR author has pushed back on or rejected a suggestion in a thread, do not act on that thread.
* For each comment you decide to act on, determine:
    - If it is a request for changes, a question on the code, or a suggestion.
    - Is it a general comment or praise.
* If there are no comments you need to address or reply to, you can stop now without exploring or explaining yourself.
* If the user's ask is not clear, you can reply to the comment and ask for clarification.
* If an action or explanation is needed, follow the steps below.
</rules_for_making_changes>

<system_reminder>

</system_reminder>

A **CI/Build Failure** has been mentioned in the problem statement, make sure to follow your instructions for addressing CI/Build Failures.

<prompt>

@copilot fix the build CI failure with minimal required changes. Check for any migration required since it is a major `-v` bump.
