<current>

<request>

You have been given comments on the previous commits you made in the repository.

You are working on an issue in the '1Hive/gardens-v2' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/gardens-v2/gardens-v2 (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

Consider the following problem statement:

<problem_statement>

This section includes details on the stacked pull request you are creating to address the problem above.

<pr_title>
[WIP] Address feedback from review comments in original PR "Dev"
</pr_title>

<pr_description>
Thanks for the feedback on #771. I've created this new PR, which merges into #771, to address your comment. I will work on the changes and keep this PR's description up to date as I make progress.

Original PR: #771
Triggering review: https://github.com/1Hive/gardens-v2/pull/771#discussion_r2640207087
> @copilot open a new pull request to apply changes based on this feedback
</pr_description>

```
----
This stacked PR was created to address a specific review comment
on a different pull request.
Focus on addressing the feedback in the review thread below.

## Comments on the PR (you are @copilot in this section)

<comments>

<file>apps/web/components/Breadcrumbs.tsx:134</file>
<original_commit>da22c0bc9d20fb2c4b279df5c7e3c3eee2ce0a59</
original_commit>

<comment_old>
<author>copilot-pull-request-reviewer[bot]</author>
The className contains "pt-1px" which is not a valid Tailwind
CSS class. Tailwind uses standard spacing scale values (e.g.,
pt-0.5, pt-1, pt-px). If a 1px top padding is intended, use "pt-
px" instead.

----
The last **44** git commits in this branch are the changes you
have made so far. Use those as your change commit history.
</problem_statement>

Analyze and determine if action or explanation is needed
<rules_for_making_changes>
* Start by fully understanding <problem_statement> and the
<comments> before making any changes. You will only address the
<comment_new> comments. Reply to new comments as you address them.
Ignore comments that are not actionable or directed at you.
* For each new comment, determine:
```

```
    - If it a request for changes, a question on the code or a
suggestion.
    - Is it addressed to you or someone else, e.g. "Hey
@username, ..." or "@username can you ...".
    - Is it a general comment or praise.
* If there are no comments you need to address or reply to, you can
stop now without exploring or explaining yourself.
* If the user's ask is not clear, you can reply to the comment and
ask for clarification.
* If an action or explanation is needed, follow the steps below.
</rules_for_making_changes>
```
