<request>

You are working on an issue in the 'codingjoe/esupgrade' repository.

<repository_context>
I've cloned the repository in the directory /tmp/workspace/codingjoe/esupgrade (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-05-29T19:50:51.216+00:00</current_datetime>

Consider the following problem statement:

<problem_statement>

This section details on the original issue you should resolve

<issue_title>Add String.replaceAll transformer</issue_title>
<issue_description>## Feature Request

Add a transformer to convert split().join() pattern to replaceAll().

Baseline Status
- **Status:** Newly Available (2021)
- **Feature:** String.prototype.replaceAll()

Transformations

```js
// Before
str.split(search).join(replace)

// After
str.replaceAll(search, replace)
```

```js
// Before (for literal strings)
str.replace(/pattern/g, replace)

// After
str.replaceAll(pattern, replace)
```

Priority
High - Much clearer intent than split/join pattern.

Note
Only available with `--baseline newly-available` flag.
