<request>

You are working on an issue in the 'libfuse/pyfuse3' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/pyfuse3/pyfuse3 (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2025-12-30T09:14:46.092Z</current_datetime>

Consider the following problem statement:

<problem_statement>

This section details on the original issue you should resolve

<issue_title>remove macOS and FreeBSD compatibility metadata</issue_title>
<issue_description>pyproject.toml declares:
```
    "Operating System :: POSIX :: Linux",
    "Operating System :: MacOS :: MacOS X",
    "Operating System :: POSIX :: BSD :: FreeBSD",
```

Considering libfuse/pyfuse3#14 and libfuse/pyfuse3#103, I think macOS and FreeBSD should be removed there - it does not even build on these OSes.</issue_description>

<agent_instructions>Update pyproject.toml as requested.</agent_instructions>

Comments on the Issue (you are @copilot in this section)

<comments>
<comment_new><author>@ThomasWaldmann</author>
This is btw. kind of a regression, considering that `pyfuse3` predecessor `llfuse` works on these systems.</comment_new>
<comment_new><author>@Nikratio</author>
Yeah, these classifiers are not a great fit to describe pyfuse3. It doesn't have any OS-dependence itself, it runs wherever libfuse3 runs. But we should try to get approximately right.</comment_new>
</comments>

</problem_statement>

Implement the necessary changes to the repository so that the requirements specified in the <problem_statement> are met.
