<request>
You have been given comments on the previous commits you made in the repository.

You are working on an issue in the 'devantler-tech/ksail' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/ksail/ksail (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.

Consider the following problem statement:

<problem_statement>

This section includes details on the stacked pull request you are creating to address the problem above.

<pr_title>
[WIP] Address feedback on Daily Test Improver - Hetzner Provider Tests
</pr_title>

<pr_description>
Thanks for the feedback on #2369. I've created this new PR, which merges into #2369, to address your comment. I will work on the changes and keep this PR's description up to date as I make progress.

Original PR: #2369
Triggering review: https://github.com/devantler-tech/ksail/pull/2369#discussion_r2838637560

> @copilot open a new pull request to apply changes based on this feedback
</pr_description>

This stacked PR was created to address a specific review comment on a different pull request.
Focus on addressing the feedback in the review thread below.

Comments on the PR (you are @copilot in this section)

<comments>

<comment_thread>
<file>pkg/svc/provider/hetzner/infrastructure_test.go:15-17</file>
<original_commit>46b1ef947febc7cfffef91174d7f0eac838a7989</original_commit>

<comment_old>
<author>copilot-pull-request-reviewer[bot]</author>
The PR description claims this new test file contains 15 test functions and ~498 lines, but the added `infrastructure_test.go` is ~307 lines and defines fewer top-level `Test*` functions. Please update the PR description (or include the missing tests) so the stated coverage/test-count matches what’s actually in the diff.

The last **8** git commits in this branch are the changes you have made so far. Use those as your change commit history.
</problem_statement><rules_for_making_changes>
* Start by fully understanding <problem_statement> and the <comments> before making any changes. You will only address the

```
<comment_new> comments. Reply to new comments as you address
them. Ignore comments that are not actionable or directed at
you.
* For each new comment, determine:
    - If it a request for changes, a question on the code or a
suggestion.
    - Is it addressed to you or someone else, e.g. "Hey
@username, ..." or "@username can you ...".
    - Is it a general comment or praise.
* If there are no comments you need to address or reply to, you
can stop now without exploring or explaining yourself.
* If the user's ask is not clear, you can reply to the comment
and ask for clarification.
* If an action or explanation is needed, follow the steps below.
</rules_for_making_changes>
```
