<current>

<request>

You have been given comments on the previous commits you made in the repository.

You are working on an issue in the '3drepo/3drepo.io' repository.

<repository_context>
I've cloned the repository in the directory /tmp/workspace/3drepo/3drepo.io (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-06-08T13:27:53.717+00:00</current_datetime>

Consider the following problem statement:

<problem_statement>

This section includes details on the pull request with code changes you have already submitted to fix the problem above.

<pr_title>
Bump axios from 1.15.0 to 1.16.0 in /backend
</pr_title>

<pr_description>
Bumps axios from 1.15.0 to 1.16.0.

<a href="https://docs.github.com/en/github/managing-security-vulnerabilities/about-dependabot-security-updates#about-

```
compatibility-scores"><img src="https://dependabot-
badges.githubapp.com/badges/compatibility_score?dependency-
name=axios&amp;package-manager=npm_and_yarn&amp;previous-
version=1.15.0&amp;new-version=1.16.0"></a>

Dependabot will resolve any conflicts with this PR as long as
you don't alter it yourself. You can also trigger a rebase
manually by commenting `@dependabot rebase`.

  <author>@carmenfan</author>
  @copilot  can you tell me what this upgrade entails, whether
  there are API level or behavioural changes that would affect
  the way we're currently using this library?
  </comment_new>
</pr_comments>

</comments>

----
The last **1** git commits in this branch are the changes you
have made so far. Use those as your change commit history.
</problem_statement>

Analyze and determine if action or explanation is needed
<rules_for_making_changes>
* Start by fully understanding <problem_statement> and the
<comments> before making any changes. Treat <comment_old> comments
as context only and do not make changes solely to satisfy them.
* Only act on <comment_new> comments that explicitly mention you
(@copilot). To understand the context of comments that explicitly
```

```
mention you, you may use other comments that do not explicitly
mention you. Do not act on comments that don't explicitly mention
you or reply to them, even if they are marked as <comment_new>.
* If the PR author has pushed back on or rejected a suggestion in a
thread, do not act on that thread.
* For each comment you decide to act on, determine:
    - If it is a request for changes, a question on the code, or a
suggestion.
    - Is it a general comment or praise.
* If there are no comments you need to address or reply to, you can
stop now without exploring or explaining yourself.
* If the user's ask is not clear, you can reply to the comment and
ask for clarification.
* If an action or explanation is needed, follow the steps below.
</rules_for_making_changes>
