<prev_user>

<request>

You are working on an issue in the 'AlaSQL/alasql' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/alasql/alasql (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2025-12-02T13:01:39.827Z</current_datetime>

Consider the following problem statement:

<problem_statement>

This section details on the original issue you should resolve

<issue_title>SELECT null [not] IN ()</issue_title>
<issue_description>_Derived from https://github.com/AlaSQL/alasql-sqllogictest/blob/a10ff82e75edafae2ce96c9d02ab47cfc85d4507/results/output.md#1620-testevidencein1test_

```sql
SELECT null IN ()
```
Expected: false but got NULL

```sql
```

```
SELECT null NOT IN ()
```
Expected: true but got NULL

</issue_description>

Comments on the Issue (you are @copilot in this section)

<comments>
</comments>

</problem_statement>

Implement the necessary changes to the repository so that the requirements specified in the <problem_statement> are met.

Ensure that you lint, build and test early and iteratively to validate each code change thoroughly.

<current_datetime>2025-12-04T03:02:05.528Z</current_datetime>

Consider the following problem statement:

<problem_statement>

This section includes details on the pull request with code changes you have already submitted to fix the problem above.

<pr_title>
[WIP] Fix behavior of null in IN and NOT IN operators
</pr_title>

<pr_description>
Thanks for assigning this issue to me. I'm starting to work on it and will keep this PR's description up to date as I form a plan and make progress.

<issue_title>SELECT null [not] IN ()</issue_title>

----
The last **1** git commits in this branch are the changes you
have made so far. Use those as your change commit history.
</problem_statement>

Analyze and determine if action or explanation is needed
<rules_for_making_changes>
* Start by fully understanding <problem_statement> and the
<comments> before making any changes. You will only address the
<comment_new> comments. Reply to new comments as you address them.
Ignore comments that are not actionable or directed at you.
* For each new comment, determine:
    - If it a request for changes, a question on the code or a
suggestion.
    - Is it addressed to you or someone else, e.g. "Hey
@username, ..." or "@username can you ...".
    - Is it a general comment or praise.
* If there are no comments you need to address or reply to, you can
stop now without exploring or explaining yourself.
* If the user's ask is not clear, you can reply to the comment and
ask for clarification.
* If an action or explanation is needed, follow the steps below.
</rules_for_making_changes>

Ensure that you lint, build and test early and iteratively to
```

```
    validate each code change thoroughly.
```
