<request>

You are working on an issue in the 'Blockception/minecraft-bedrock-language-server' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/minecraft-bedrock-language-server/minecraft-bedrock-language-server (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-04-02T06:22:34.467Z</current_datetime>

Consider the following problem statement:

<problem_statement>

This section details on the original issue you should resolve

<issue_title>Request for implementation: WorldPack.process() and getDataset() are empty stubs</issue_title>
<issue_description>## Summary
`WorldPack.process()` and `WorldPack.getDataset()` in `packages/bedrock-project/src/project/world/world-pack.ts` are empty stub implementations that silently do nothing. `process()` calls `this.deleteFile()` which itself returns `false`, meaning world-pack files are never indexed.

Task (proposal — open for discussion)
- Either implement proper world-pack data indexing (behaviour packs / resource packs embedded in world folders)
- Or replace stubs with `abstract` methods on a shared base class so TypeScript enforces implementations and the intent is explicit.
- At minimum, add a `// TODO` comment with a tracking issue reference so this is not silently missed.

Affected files

```
- `packages/bedrock-project/src/project/world/world-pack.ts`

## Acceptance criteria
- [ ] The intent of `WorldPack.process()` is clearly documented
or implemented
- [ ] If unimplemented, a compile-time or lint-time warning
makes this visible
- [ ] No silent no-ops remain without explanation</
