<current>

<request>

You are working on a task in the 'Lint-Free-Technology/uix' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/uix/uix (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-04-15T05:11:56.400Z</current_datetime>

Consider the following problem statement:

<problem_statement>
When we introduced doc_animation there was a regression where Image.getdata was again used. Please update to use get_flattened_data instead and remember not to use the deprecated Image.getData

tests/visual/test_doc_images.py: 11 warnings
  /Users/darryn/Development-HA/uix/tests/visual/scenario_runner.py:1754: DeprecationWarning: Image.Image.getdata is deprecated and will be removed in Pillow 14 (2027-10-15). Use get_flattened_data instead.
    diff_pixels = sum(1 for p in diff.getdata() if any(c > 0 for c in p))

-- Docs: https://docs.pytest.org/en/stable/how-to/capture-warnings.html
</problem_statement>

First, determine whether the <problem_statement> requires code changes, an explanation, a plan, or analysis. Then follow the

appropriate path:

If the task requires code changes:

If the task is a question or only requires creating a plan or analysis: respond directly without making code changes.

<prompt>

When we introduced doc_animation there was a regression where Image.getdata was again used. Please update to use get_flattened_data instead and remember not to use the deprecated Image.getData

```
tests/visual/test_doc_images.py: 11 warnings
  /Users/darryn/Development-HA/uix/tests/visual/
scenario_runner.py:1754: DeprecationWarning: Image.Image.getdata is
deprecated and will be removed in Pillow 14 (2027-10-15). Use
get_flattened_data instead.
    diff_pixels = sum(1 for p in diff.getdata() if any(c > 0 for c
in p))

-- Docs: https://docs.pytest.org/en/stable/how-to/capture-
warnings.html
```
