<request>

You are working on an issue in the 'envoyproxy/toolshed' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/toolshed/toolshed (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2025-12-29T22:24:05.789Z</current_datetime>

Consider the following problem statement:

<problem_statement>
in this repo there is a gh action gh-actions/docker/shas

it gets shas for a set of given images

i need to do something similar ...

i want a new action `gh-actions/github/release/shas` - that does something similar but with the artifacts from a release - stretch goal being having some kinda filter so we can avoid downloading/checksumming all if there are many and we only need some

use jq/bson actions for the win
</problem_statement>

Implement the necessary changes to the repository so that the requirements specified in the <problem_statement> are met.
