<request>

You are working on an issue in the 'thunderstore-io/thunderstore-ui' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/thunderstore-ui/thunderstore-ui (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2025-11-25T23:39:42.504Z</current_datetime>

Consider the following problem statement:

<problem_statement>
Separate all primitiveComponents, components and newComponents into standalone publishable packages under packages/cyberstorm/src. Make sure to properly add the dependencies to each new package that is creates. (Add the new packages under the /packages/cyberstorm folder)
</problem_statement>

Implement the necessary changes to the repository so that the requirements specified in the <problem_statement> are met.

Ensure that you lint, build and test early and iteratively to validate each code change thoroughly.
