Consider the following problem statement:

<problem_statement>

This section includes details on the pull request with code changes you have already submitted to fix the problem above.

<pr_title>
Make Vale editing skill more specific about proper em dash usage
</pr_title>

<pr_description>
The clankers love to use em dashes when constructing lists with items and descriptions that should be colon-separated instead. This edit attempts to provide them with better guidance when dealing with Vale errors regarding em dashes.
</pr_description>

Pull request overview

Updates the Vale style-rules skill documentation to give more explicit guidance on when em dashes are appropriate, specifically discouraging their use in label/explanation list items.

Changes:
- Added a dedicated “Em dashes in body vs. lists” section with positive/negative examples.
- Expanded the SKILL quick-reference to explicitly forbid em dashes in list items and recommend colon-separated label/explanation format.

Reviewed changes

Copilot reviewed 2 out of 2 changed files in this pull request and generated 2 comments.

File	Description
.skills/vale-style-rules/reference.md	Adds detailed guidance and examples clarifying em dash usage in body text vs. list items.
.skills/vale-style-rules/SKILL.md	Updates the quick reference to include a more specific em dash rule with an example.

💡 <a>Add Copilot custom instructions for smarter, more guided reviews. Learn how to get started.

In these examples, the text after the colon starts with a lowercase verb ("manage", "automatic"). Elsewhere in this doc (e.g., "**Create IAM Role:** An IAM role…"), the post-colon explanation is treated as a sentence and starts capitalized. Consider capitalizing the first word after the colon in the ✅ list examples for consistency and to reinforce the intended pattern.
```suggestion
- ✅ List: `- Bring Your Own Keys: Manage provider API keys centrally`
- ✅ List: `- Multi-provider failover: Automatic failover across providers`
```

@copilot good suggestion bro. Make this change everywhere you found this discrepancy and also add a line of text to explicitly state that colon-separated lists should capitalize the first word after the colon.

The inline example after the colon starts with a lowercase word ("manage"). If the convention here is that the post-colon part is an explanation sentence (as in the reference examples), consider capitalizing it ("Manage…") for consistency and clearer guidance.
```suggestion
- **Em dashes**: Use em dashes only to connect related sentence fragments in body content—like this. Never use em dashes in list items; use colon-separated format (e.g. `- Bring Your Own Keys:
```

Manage provider API keys centrally`).
```
