<request>

You are working on an issue in the '00sapo/sp-autoplan' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/sp-autoplan/sp-autoplan (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-01-16T13:40:58.033Z</current_datetime>

Consider the following problem statement:

<problem_statement>

This section details on the original issue you should resolve

<issue_title>splitting dynamically</issue_title>
<issue_description>The minimum block size is *minimum* in taskcheck, but here it is *fixed*. The problem is that splitting of tasks here happens at the beginning of the scheduling process, while it should happen only when it is really needed, so if we need to schedule 3 hours from a task long 5 hours with a minimum block size of 2 hours, we can do it (now, we would schedule a 2 hour block and leave the remaining hour empty).</issue_description>

Comments on the Issue (you are @copilot in this section)
