Analyze and determine if action or explanation is needed
<rules_for_making_changes>
* Start by fully understanding <problem_statement> and the <comments> before making any changes. You will only address the <comment_new> comments. Reply to new comments as you address them. Ignore comments that are not actionable or directed at you.
* For each new comment, determine:
    - If it a request for changes, a question on the code or a suggestion.
    - Is it addressed to you or someone else, e.g. "Hey @username, ..." or "@username can you ...".
    - Is it a general comment or praise.
* If there are no comments you need to address or reply to, you can stop now without exploring or explaining yourself.
* If the user's ask is not clear, you can reply to the comment and ask for clarification.
* If an action or explanation is needed, follow the steps below.
</rules_for_making_changes>

<prev_assistant>

The build is now fixed. The root cause was a breaking change in TypeScript 6: when `outDir` is configured, `rootDir` must now be explicitly specified. Added `"rootDir": "./app"` to `tsconfig.json` and

also added `tsconfig.tsbuildinfo` to `.gitignore` to avoid committing incremental build artifacts.

<pr_title>
chore(deps): update dependency typescript to v6
</pr_title>

<pr_description>
- [x] Investigate TypeScript 6 build failure
- [x] Fix tsconfig.json: add explicit `rootDir` (required by TypeScript 6 when `outDir` is set)
- [x] Add `tsconfig.tsbuildinfo` to .gitignore
- [x] Verified build succeeds and all tests pass
</pr_description>

> @copilot fix the build

Fixed in d546628. TypeScript 6 now requires `rootDir` to be explicitly set when `outDir` is configured — added `"rootDir": "./app"` to `tsconfig.json`. Also added `tsconfig.tsbuildinfo` to `.gitignore`. Build and tests pass.
