<current>

<request>

You are working on an issue in the 'onlook-dev/onlook' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/onlook/onlook (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

Consider the following problem statement:

<problem_statement>

This section details on the original issue you should resolve

<issue_title>[bug] Fonts loaded from the font panel are not implemented correctly</issue_title>
<issue_description>#### Describe the bug
If the user chooses a font from the font panel, it is often only partially implemented. It may still needed to be added to the globals.css to be used correctly in the project </issue_description>

Comments on the Issue (you are @copilot in this section)

<comments>
</comments>

</problem_statement>

Implement the necessary changes to the repository so that the requirements specified in the <problem_statement> are met.

```
Ensure that you lint, build and test early and iteratively to
validate each code change thoroughly.
```
