<request>

You are working on an issue in the 'spences10/mcpick' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/mcpick/mcpick (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

Consider the following problem statement:

<problem_statement>

This section details on the original issue you should resolve

<issue_title>This is duplicated code from lines 188-192. The display logic for server details should be extracted into a reusable function to avoid code duplication.</issue_title>
<issue_description>This is duplicated code from lines 188-192. The display logic for server details should be extracted into a reusable function to avoid code duplication.

            </issue_description>

Comments on the Issue (you are @copilot in this section)

<comments>
</comments>

</problem_statement>

Implement the necessary changes to the repository so that the requirements specified in the <problem_statement> are met.

Ensure that you lint, build and test early and iteratively to validate each code change thoroughly.
