<request>

You are working on a task in the 'cloudwego/cloudwego.github.io' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/cloudwego.github.io/cloudwego.github.io (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-04-09T08:27:51.464Z</current_datetime>

Consider the following problem statement:

<problem_statement>
我发表了上述评论，但是 CLA assistant 没有自动识别这条评论，状态也没有从 pending 变为 success。
</problem_statement>

First, determine whether the <problem_statement> requires code changes, an explanation, a plan, or analysis. Then follow the appropriate path:

If the task requires code changes:

If the task is a question or only requires creating a plan or analysis: respond directly without making code changes.

<prev_assistant>

您的签署评论已经发出（2026-04-09T08:24:33Z），但 CLA assistant 还没有重新检查。

解决方法：直接点击 recheck 链接

CLA assistant 已在评论中提供了 recheck 链接，请直接访问：

👉 **https://cla-assistant.io/check/cloudwego/cloudwego.github.io?pullRequest=1536**

点击该链接后，CLA assistant 会立即重新扫描 PR，检测到您的签署评论，状态会从 `pending` 变为 `success`。

为什么会出现这种情况？

CLA assistant 通常通过 webhook 监听评论事件。如果 webhook 触发延迟或失败，bot 不会自动更新状态，需要手动触发 recheck。
