<current>

<request>

You are working on a task in the 'ubiquiti-community/terraform-provider-unifi' repository.

<repository_context>
I've cloned the repository in the directory /tmp/workspace/ubiquiti-community/terraform-provider-unifi (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-06-03T15:44:22.033+00:00</current_datetime>

Consider the following problem statement:

<problem_statement>
Create a PR to fix the formatting, any failing tests, and any failing lint/workflow issues after the latest merges.

You should also generate the docs and push them to the PR.
</problem_statement>

First, determine whether the <problem_statement> requires code changes, an explanation, a plan, or analysis. Then follow the appropriate path:

If the task requires code changes:

If the task is a question or only requires creating a plan or analysis: respond directly without making code changes.
