# be78f68d-8a24-44a6-9c3d-38a76af134

**<current>**

**<request>**

You are working on an issue in the 'szobov/ros-opentelemetry' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/ros-opentelemetry/ros-opentelemetry (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

Consider the following problem statement:

<problem_statement>
Create a short readme that will make use of the just tool and the justfile

Summarize the purpose of the tool in a professional and deeply technical way without using emojis
</problem_statement>

Implement the necessary changes to the repository so that the requirements specified in the <problem_statement> are met.

Ensure that you lint, build and test early and iteratively to validate each code change thoroughly.
