Consider the following problem statement:

<problem_statement>

This section includes details on the pull request with code changes you have already submitted to fix the problem above.

<pr_title>
Auto-configuration of actor-system in default_yaml.yml
</pr_title>

<pr_description>
Changelog entry

Before: Manual configuration with 5 executors and scheduler
After: Auto-configuration with 2 parameters:
```
actor_system_config:
  use_auto_config: true
  cpu_count: 8
```

Related issue: https://github.com/ydb-platform/ydb/issues/31636

Changelog category

* Not for changelog (changelog entry is not required)

The last **1** git commits in this branch are the changes you have made so far. Use those as your change commit history.
</problem_statement>

Analyze and determine if action or explanation is needed
<rules_for_making_changes>
* Start by fully understanding <problem_statement> and the <comments> before making any changes. You will only address the <comment_new> comments. Reply to new comments as you address them. Ignore comments that are not actionable or directed at you.
* For each new comment, determine:
    - If it a request for changes, a question on the code or a suggestion.
    - Is it addressed to you or someone else, e.g. "Hey @username, ..." or "@username can you ...".
    - Is it a general comment or praise.
* If there are no comments you need to address or reply to, you can stop now without exploring or explaining yourself.
* If the user's ask is not clear, you can reply to the comment and ask for clarification.
* If an action or explanation is needed, follow the steps below.
</rules_for_making_changes>

A **CI/Build Failure** has been mentioned in the problem statement,

```
make sure to follow your instructions for addressing CI/Build
Failures.
```
