<request>

You are working on a task in the 'ngrok/ngrok-operator' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/ngrok-operator/ngrok-operator (not in /tmp/nix-shell.S65Mk4/inputs).
Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-03-26T15:03:32.564Z</current_datetime>

Consider the following problem statement:

<problem_statement>
I think there is a bug in the AgentEndpoint kubebuilder validation for the upstream ProxyProtocolVersion enum. I think there is a mismatch between the enum having integer type and the the commonv1alpha1.ProxyProtocolVersion being a string. If this is the case, please fix it and generate the necessary manifests. If not, please explain why its not an issue
</problem_statement>

First, determine whether the <problem_statement> requires code changes, an explanation, a plan, or analysis. Then follow the appropriate path:

If the task requires code changes:

If the task is a question or only requires creating a plan or analysis: respond directly without making code changes.
