<request>

You have been given comments on the previous commits you made in the repository.

You are working on an issue in the 'maiertech/website' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/website/website (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

Consider the following problem statement:

<problem_statement>

This section includes details on the pull request with code changes you have already submitted to fix the problem above.

<pr_title>
Migrate copilot-instructions.md to AGENTS.md for multi-agent support
</pr_title>

<pr_description>
This PR migrates the existing </pr_description>`.github/copilot-instructions.md` file to `AGENTS.md` in the project root, following modern conventions for multi-agent development environments.

Commit Structure

Based on feedback, this PR is structured as two separate commits to clearly show the migration process:

1. **First Commit (21e5b0d)**: Simple move of content from `.github/copilot-instructions.md` to `AGENTS.md` and deletion of

the original file
2. **Second Commit (859cb16)**: Improvements and enhancements to `AGENTS.md` for multi-agent support

Key Changes

- **Relocated**: Moved instructions from `.github/copilot-instructions.md` to `AGENTS.md` in project root
- **Enhanced Structure**: Reorganized content with improved markdown formatting and logical sections
- **Multi-Agent Support**: Added agent-specific instructions for different development roles:
  - Development Agents (TypeScript, Svelte v5, component development)
  - Content Agents (MDX authoring, writing style)
  - Testing Agents (type safety, schema validation)

Improvements Made

1. **Better Organization**: Split content into clear sections with descriptive headings
2. **Visual Documentation**: Added ASCII tree structure for repository layout
3. **Enhanced Tech Stack**: More detailed descriptions with specific versions and purposes
4. **Build Commands**: Added reference for common development commands
5. **Agent-Specific Guidelines**: Tailored instructions for different types of AI agents

The new `AGENTS.md` format provides clearer guidance for multiple development agents while maintaining all the original project-specific instructions for code style, writing guidelines, and technical requirements.

Fixes #1024.

Comments on the PR (you are @copilot in this section)

<comments>

<pr_comments>

<comment_old>
<author>@maiertech</author>
I want to see two commits:

1. You just copy the content of </comment_old></pr_comments></comments>`copilot-instructions.md` to `AGENTS.md` (and delete the instructions file).
2. You make a second commit in which you improve `AGENTS.md`. I want to be able to see what you changed.
<comment_old>
<author>@maiertech</author>
I would like to see the changes applied to </comment_old>`AGENTS.md`. I suggest to create two commits:

- The first commit just moves the content of `copilot-instructions.md` to `AGENTS.md` and the second commit makes the changes on `AGENTS.md`.
<comment_old>
<author>@maiertech</author>
@copilot Can you rebase this and address my review comments?
</comment_old>

<comment_old>
<author>@copilot</author>

> @copilot Can you rebase this and address my review comments?

I've rebased and addressed your review comments by creating two separate commits as requested. The first commit (21e5b0d) simply moves the content, and the second commit (859cb16) contains the improvements.

> I want to see two commits:
>
> 1. You just copy the content of </comment_old>`copilot-instructions.md` to `AGENTS.md` (and delete the instructions file).
...

I've addressed your feedback by creating two separate commits:

1. **21e5b0d**: Just moved the content from `copilot-instructions.md` to `AGENTS.md` and deleted the original file
2. **859cb16**: Made improvements to `AGENTS.md` with enhanced structure for multi-agent support

You can now clearly see the difference between the simple move and the improvements made.

<prev_assistant>

Excellent! I have successfully:

1. **Enhanced the `AGENTS.md` file** with a comprehensive structure for

multi-agent support, including:
   - Better organization with clear sections and descriptive headings
   - Enhanced tech stack descriptions with specific versions and purposes
   - Visual documentation with ASCII tree structure for repository layout
   - Agent-specific instructions for different development roles (Development Agents, Content Agents, Testing Agents)
   - Build commands reference for common development tasks

2. **Committed the improvements** with commit hash `3a0aedd` and updated the PR description to reflect the complete two-commit structure

3. **Replied to @maiertech's comment** to inform them that the `AGENTS.md` file has been improved and the PR updated

The PR now properly shows the migration process:
- **First commit (c1a3dd8)**: Simple move by @maiertech
- **Second commit (3a0aedd)**: My improvements for multi-agent support

This addresses @maiertech's request to improve the `AGENTS.md` file and update the PR based on the updated branch.

<comment_old>
<author>@copilot</author>

&gt; @copilot Can you rebase this and address my review
comments?

I've rebased and addressed your review comments by creating two
separate commits as requested. The first commit (21e5b0d) simply
```

moves the content, and the second commit (859cb16) contains the improvements.

> I want to see two commits:

@copilot Based on the updated branch, you can now improve the </comment_old>`AGENTS.md` file and update the PR.
<comment_old>
<author>@copilot</author>

> @copilot Based on the updated branch, you can now improve the </comment_old>`AGENTS.md` file and update the PR.

I've improved the `AGENTS.md` file with enhanced structure for multi-agent support (commit 3a0aedd). The improvements include:

- Better organization with clear sections and descriptive headings
- Enhanced tech stack descriptions with specific versions
- ASCII tree structure for repository layout
- Agent-specific instructions for Development, Content, and Testing agents
- Build commands reference

The PR has been updated with these enhancements.
