<request>

You are working on an issue in the 'github/gh-aw' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/gh-aw/gh-aw (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-02-13T19:33:51.437Z</current_datetime>

Consider the following problem statement:

<problem_statement>
Update landing page in docs:

- guardrail header needs to be same level as others
- move blog section down above gallery
- review style of blog box and harmonize with the style of the docs
</problem_statement>

Implement the necessary changes to the repository so that the requirements specified in the <problem_statement> are met.

<prev_assistant>

Excellent! All changes have been successfully implemented and committed. Let me create a summary of what was accomplished:

Summary

I've successfully completed all the requirements from the problem statement:

✅ Changes Implemented

1. **Fixed Guardrails Header Level**
   - Changed "Guardrails Built-In" from `###` (level 3) to `##` (level 2)
   - Now matches the hierarchy of other main sections like "Key Features", "Example: Daily Issues Report", "Gallery", etc.

2. **Repositioned Blog Section**
   - Moved `BlogLinkSection` component from after the NOTE warning (originally line 36-40)
   - Now positioned above the Gallery section (line 99-105)
   - Provides better content flow with the blog link appearing after the example workflow description

3. **Harmonized Blog Box Styling**
   - Updated `BlogLinkSection.astro` to match the docs design system
   - Applied same styling patterns as `FeatureCard`:
     - Border: `1px solid #30363d` (dark) / `#d0d7de` (light)
     - Background: `rgba(13, 17, 23, 0.6)` with `backdrop-filter: blur(8px)`
     - Border radius: `6px`
     - Purple accent colors: `#8b5cf6` (dark) / `#6639ba` (light)
     - Gradient overlay effect on hover
     - Smooth transitions with proper accessibility support (`prefers-reduced-motion`)
   - Full theme support for both dark and light modes

✅ Verification
- Docs build successfully with no errors
- All internal links validated
- Visual verification with screenshots confirms proper styling and positioning
- Changes committed and pushed to the PR

The landing page now has a consistent visual hierarchy, better content organization, and unified styling across all components!

<current>

<prompt>

Update landing page in docs:

```
- guardrail header needs to be same level as others
- move blog section down above gallery
- review style of blog box and harmonize with the style of the docs
```
