<request>

You are working on an issue in the 'EvolvingLMMs-Lab/OneVision-Encoder' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/OneVision-Encoder/OneVision-Encoder (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-02-06T06:08:14.187Z</current_datetime>

Consider the following problem statement:

<problem_statement>
LMM Probe Results
We train the model on a mixed dataset comprising 740K samples from LLaVA-OneVision and 800K samples from LLaVA-Video SFT, proceeding directly to Stage-2 fine-tuning. Following a streamlined native-resolution strategy inspired by LLaVA-OneVision, input frames that match the model’s native resolution are fed directly into the network without tiling or cropping, allowing us to fully evaluate the ViT’s native-resolution modeling capability.

这里，强调下，使用llava-next文件夹的内容来复现
</problem_statement>

Implement the necessary changes to the repository so that the requirements specified in the <problem_statement> are met.
