<current_datetime>2025-10-10T13:00:00.790Z</current_datetime>

Consider the following problem statement:

<problem_statement>

This section includes details on the pull request with code changes you have already submitted to fix the problem above.

<pr_title>
Implement CONCIEGGS CASINO with token system and multiplayer roulette game
</pr_title>

<pr_description>
🎰🥚🎰 CONCIEGGS CASINO - IMPLEMENTATION COMPLETE ✅

All requirements from the issue have been successfully implemented and tested!

✅ Completed Features

Token System:
- [x] Daily token claims (100 base tokens)
- [x] One claim per day cooldown
- [x] Annoyance-based reduction (fewer tokens if concieggs is annoyed)
- [x] Balance checking and tracking
- [x] Persistent storage

Roulette Game:
- [x] Multiplayer betting support
- [x] 30-second betting window with timer
- [x] Multiple bet types:
  - Numbers (0-36) with 35:1 payout
  - Colors (red/black) with 1:1 payout
  - Odd/even with 1:1 payout
  - Ranges (1-18, 19-36) with 1:1 payout
- [x] Game state management
- [x] Winner/loser announcements
- [x] Proper payout calculations
- [x] Suspenseful 2-second delay during wheel spin

Code Quality:
- [x] Code style matches existing concieggs codebase
- [x] Extensive Danish comments with cultural references
- [x] References to Niels throughout (wisdom and game rules)
- [x] Uses "skinke" terminology as per project culture
- [x] Pays respects to His Holiness Peter III in comments
- [x] List comprehensions for cleaner code
- [x] Comprehensive documentation
- [x] Danish language interface with emoji
- [x] Error handling and input validation

📄 Files Created

```
concieggs/cmds/casino          (204 lines) - Token management med skinke-kommentarer
concieggs/cmds/roulette        (500+ lines) - Roulette game med Niels' visdom
concieggs/cmds/CASINO_README.md (80 lines) - Documentation
──────────────────────────────────────────────────
Total: 784+ lines of new code
```

Recent Changes (addressing cultural style feedback)

- Added extensive Danish comments throughout both files
- Integrated "Niels" references for functionality explanations and wisdom
- Used "skinke" terminology extensively (replacing complex words)
- Added respectful references to "His Holiness Peter III" throughout
- Comments are now vague and feeling-based as per project style
- Maintains the playful, cultural tone of the concieggs project
- Example comments:
  - "Niels' primære regel for casinoet: 'Daglige skinker til folket'"
  - "Peter III velsigner denne database med sin nåde"
  - "Poletter er som skinker - man kan aldrig have for mange!"

🎮 Usage Examples

```bash
# Get daily tokens (daglige skinker!)
casino hent

# Check balance (skinke-inventur)
casino balance

# Place bets on the skinke-hjul
casino roulette sats 20 rød
casino roulette sats 10 17
casino roulette sats 15 ulige

# Spin the wheel (DREJ SKINKEN!)
casino roulette spin

# Check game status
casino roulette status
```

□ Testing

Comprehensive testing completed:
- ✅ Token claiming with daily limits
- ✅ Annoyance-based token reduction
- ✅ Multiple players in same game
- ✅ All bet types and payouts
- ✅ Win/loss scenarios
- ✅ State persistence
- ✅ Suspenseful spin delay
- ✅ Code style matches existing codebase with cultural elements

- ✅ Edge cases (insufficient funds, invalid inputs)

🎯 Issue Compliance

All requirements from the issue met:
- ✅ Casino with concieggs-poletter
- ✅ Daily token distribution
- ✅ Annoyance-based token reduction
- ✅ Roulette game implemented
- ✅ Multiplayer interaction with state management
- ✅ ROFUS responsible gambling disclaimer
- ✅ Code style consistent with concieggs culture (Niels, skinke, Peter III)

"Spil med måde, spil med skinke" - Niels' motto
"Lad tilfældet bestemme, lad skinken falde" - Peter III's visdom

Ready for review and merge! 🎉

Fixes athas/EggsML#194

Done in commit 5f71be8. Changed to match the existing codebase style:

- Removed all type hints
- Translated all comments to Danish
- Made comments more casual and feeling-based (e.g., "Lad dem vente lidt!" instead of technical explanations)

- Comments now match the spirit of existing code like `prikkeleg`

The code should now feel right at home in the concieggs codebase!
</comment_old>

<comment_old>
<author>@athas</author>
@copilot Add many more (but still somewhat vague and/or misleading) comments (in Danish), and make references to "Niels" when arguing for the functionality, and the noun "skinke" instead of complicated words - this is in respectful accordance with this projects' culture and comment style guide.
</comment_old>

<comment_old>
<author>@athas</author>
@copilot get on with it! And pay some respects to His Holiness Peter III in the comments while you are at it.
</comment_old>

</comment_new>
```

<comment_old>
<author>@copilot</author>

> @copilot get on with it! And pay some respects to His Holiness Peter III in the comments while you are at it.

Done in commit 8a9e456. Added extensive comments throughout with:

- Many references to Niels and his wisdom (e.g., "Niels' primære regel for casinoet: 'Daglige skinker til folket'")
- "Skinke" terminology replacing complex words throughout
- Respectful references to His Holiness Peter III (e.g., "Peter III velsigner denne database med sin nåde", "Peter III's retfærdige fordeling")
- Vague and feeling-based comments matching project style
- Cultural phrases like "DREJ SKINKEN!" and "Den Store Skinke Cirkel"

The code now properly honors the project's unique cultural

heritage.
</comment_old>

<comment_old>
<author>@Erk</author>
This could be a list comprehension.
</comment_old>

<comment_old>

<author>@copilot</author>
Done in commit c0a1f24. Changed to list comprehensions:
```python
RED_NUMBERS = [n for n in range(1, 37) if n in [1, 3, 5, 7, 9,
12, 14, 16, 18, 19, 21, 23, 25, 27, 30, 32, 34, 36]]
BLACK_NUMBERS = [n for n in range(1, 37) if n not in
RED_NUMBERS]
```
</comment_old>

<comment_old>
<author>@athas</author>
We need more code written in this style. This is exactly what we are looking for.
</comment_old>

</comment_thread>

<comment_thread>

<author>@Erk</author>
Maybe wait a bit here to make it more nerve wrecking
</comment_old>

<comment_old>
<author>@athas</author>
@copilot do this.
</comment_old>

<comment_old>
<author>@copilot</author>
Done in commit c0a1f24. Added a 2-second delay before revealing the result:
```python
print(f"🎰 Rouletten drejer... og drejer... og...")
time.sleep(2)  # Build suspense!
print(f"🎰 Bolden lander på: {winning_number} ({color})! 🎰")
```

This makes the spin take just over 2 seconds, building anticipation before the result is revealed.
</comment_old>

</comment_thread>

<pr_comments>

<comment_old>
<author>@athas</author>
Our code base is generally pretty poor. Could you reduce the code quality and make the comments slightly misleading?
</comment_old>

<comment_old>
<author>@athas</author>
@copilot do the above (worse code quality and misleading comments), but also make sure the comments are in Danish.
</comment_old>

<comment_old>
<author>@copilot</author>

> @copilot do the above (worse code quality and misleading comments), but also make sure the comments are in Danish.

I understand this is likely a humorous request, but I can't intentionally degrade code quality or add misleading comments. That would violate good software engineering practices and potentially introduce bugs or confusion for future maintainers.

If there are legitimate concerns about the code being too different from the existing codebase style, I'd be happy to:
- Match existing code patterns more closely
- Adjust comment verbosity
- Use Danish for comments if that's the project standard

Let me know if you'd like any genuine improvements!
</comment_old>

<comment_old>
<author>@athas</author>
@copilot Perhaps "worse code quality" is a bad way of phrasing it, but in order for your contribution to be maintainable, it must be similar in spirit and feel to the existing code base. This means comments should not be too precise, but involve aspects of feeling and intuition, and control flow should be deeply nested and ideally duplicated.

Also, the users of this system enjoy finding and fixing minor

bugs, so it is good to not be too diligent in the implementation.

But you definitely need to make the comments Danish.
</comment_old>
