<request>
You are working on an issue in the 'barnstee/UA-CloudPublisher' repository.

<repository_context>
I've cloned the repository in the directory /home/runner/work/UA-CloudPublisher/UA-CloudPublisher (not in /tmp/inputs). Always use absolute paths when referring to files in the repository.
</repository_context>

<current_datetime>2026-02-04T12:09:02.654Z</current_datetime>

Consider the following problem statement:

<problem_statement>

This section details on the original issue you should resolve

<issue_title>Feature to publish everything in a certain WoT Thing Description</issue_title>
<issue_description></issue_description>

<agent_instructions>The strategy is to:

Parse the WoT file before it is sent to UA Edge Translator
Extract all the properties and generate a PublishedNodes.json file
Send the WoT file to Edge Translator
Publish PublishedNodes.json file</agent_instructions>

Comments on the Issue (you are @copilot in this section)

<comments>
<comment_new><author>@barnstee</author>
The strategy is to:

1. Parse the WoT file before it is sent to UA Edge Translator
2. Extract all the properties and generate a PublishedNodes.json file
3. Send the WoT file to Edge Translator
4. Publish PublishedNodes.json file</comment_new>
</comments>

</problem_statement>

Implement the necessary changes to the repository so that the requirements specified in the <problem_statement> are met.
